PROFILE

Final-year engineering student specializing in Information Systems Management & Governance (ENSIASD). Consulting-oriented training covering functional analysis, business process modeling, IS governance, project management and ERP systems. Hands-on experience in development, testing, documentation and cross-functional collaboration with business and technical stakeholders. Seeking a graduation internship (PFE) as an IS Consultant within a consulting firm, contributing to needs analysis, functional scoping and change management engagements.

EDUCATION

Engineering Degree — Information Systems Management & Governance — ENSIASD, Morocco 2024 – Present

- Key coursework: ERP Systems, Business Process Management, IS Governance, Database Systems, Software Engineering, Change Management.

University Diploma of Technology (DUT) — Computer Science — EST Essaouira, Morocco 2022 – 2024

PROFESSIONAL EXPERIENCE

Full-Stack & AI Automation Intern — EtudiaLab, Morocco 04/2026 – 06/2026

- Contributed to requirements analysis, functional specification writing and testing for an EdTech platform, working directly with business stakeholders.
- Developed features (React, Django) and produced technical and user documentation within an Agile / CI/CD environment.
- Built automation workflows to streamline internal processes.

Full-Stack Developer Intern — Marsa Maroc — Port Authority, Agadir 06/2025 – 09/2025

- Contributed to enterprise applications (React.js, NestJS, PostgreSQL) within a public-sector organization with strong reliability and governance requirements.
- Took part in code reviews, functional discussions and production feature delivery.
- Collaborated with multidisciplinary teams to improve maintainability and scalability of solutions.

Full-Stack Developer — Stryve Solution, Agadir 04/2024 – 07/2024

- Designed and modeled an e-commerce platform: architecture, database and business workflows.
- Integrated secure transaction mechanisms and authored technical documentation.

Mobile Developer Intern — Flawko, Marrakech 09/2023 – 12/2023

- Developed Android applications (Java) in collaboration with design teams to improve user experience.

PROJECTS — ANALYSIS & INFORMATION SYSTEMS

ERP Project — Management Information System — ENSIASD Academic Project 2025

- Designed an ERP-oriented information system covering inventory, purchasing, sales and reporting processes.
- Analyzed business workflows and modeled enterprise processes using information systems methodologies.
- Modeled relational databases, wrote functional specifications and executed functional test scenarios.
- Produced user documentation and process diagrams to support system adoption.

Enterprise Management Platform — Personal Project 2025 – 2026

- Developed a business management platform with authentication, reporting dashboards and data management features.
- Designed scalable APIs, relational database structures and administrative workflows.

SKILLS

Consulting & IS	Functional Analysis, Business Process Modeling (BPM), ERP Concepts, Requirements Specification, IS Governance
Methodologies	Project Management, Agile/Scrum, Functional Testing, Validation, Change Management
Data & Systems	PostgreSQL, Database Design, SQL, REST APIs
Technical Support Skills	React.js, Next.js, Django, NestJS, Git, Docker, Linux
Documentation	Functional and technical documentation, specification writing, user materials
Languages	Arabic (Native) · French (Professional) · English (Professional)
